No 58, Saytanar San Street, Chan Aye Thar Yar Quarter,
Minbu, Myanmar

To whom it may concern,

I am delighted to write this letter of recommendation for May Thinzar Ko in support of her application to the Computer Science programme at Bangkok University. I am the founder and teacher at Saytanar San English Language Centre, Minbu. May Thinzar Ko has been a remarkable student since 2019, and I have developed such a strong personal rapport with her and a clear understanding of her as a learner that I can give a reliable evaluation of her. Her positive and reliable personality traits, as well as her exceptional motivation, convince me that she is a strong candidate for a position at your institute.

May Thinzar Ko is one of the most responsible and dedicated students at my language centre because of her excellent performances inside and outside the classroom. In my language classes, I find her so industrious that she can demonstrate good progress in her English proficiency. With great determination and intrinsic motivation, she has always been attentive during lessons and active in participating in group discussions. In addition, I have recognized that she not only understands concepts very well but also has strong critical thinking skills that enable her to discuss issues and provide effective comments. Hence, she would be an enthusiastic and dynamic learner who will continue to develop herself at the university.

One thing I particularly appreciate about May Thinzar Ko is her interest in technology and creative activities. She served as a volunteer teaching assistant in our young learner classes, a coordinator of the Saytanar San Speaking Club, and an administrative team member of the Saytanar San Book Club. May Thinzar Ko took on responsibilities such as creating lesson handouts, designing posters, running social media channels of the clubs, and writing content for the clubs, which reflects her natural talent for technology and creative work. I believe her curiosity, creativity, and enthusiasm for technology will be valuable strengths as she pursues her studies in Computer Science.

Overall, I am pleased to recommend May Thinzar Ko, and I firmly believe that she possesses the qualities and abilities necessary to continue her education at your institution. Furthermore, I am confident that her dedication, intellectual curiosity, and positive attitude will enable her to fulfill her responsibilities successfully as a student and contribute effectively to any community.

Faithfully,
Hay Marn Oo
